Company Profile and Business Review 2007

DZ BANK Ireland plc is a wholly owned subsidiary of DZ BANK AG Deutsche Zentral-Genossenschaftsbank, Frankfurt am Main (DZ BANK AG).

The Parent Company

DZ BANK AG is the central bank, corporate bank and parent holding company for the DZ BANK Group. It was established in September 2001 by the merger of DG BANK and GZ-Bank. In terms of total assets, the DZ BANK Group ranked among the top five banking groups in Germany at year-end 2007.

As a central bank, DZ BANK AG is responsible for servicing 1,011 out of 1,232 local cooperative banks which in total have aggregate assets of EUR 632 billion as at December 2007. The cooperative banks have a significant share of the fragmented German market with approximately 18% of retail deposits and 15% of retail loans. DZ BANK AG acts as a liquidity manager for, and supports, the local cooperative banks with transactions such as brokerage and securities processing, international business and the development of retail products and individual customer solutions.

As an internationally oriented corporate bank, DZ BANK AG provides the full range of corporate banking services to its predominantly SME customers and also provides investment banking services in the areas of fixed income and private, customer oriented securities services. DZ BANK AG is represented in all key financial centres in Europe, the U.S. and Asia.

As a holding company, DZ BANK AG coordinates the efforts of the cooperative sector's wide range of specialist product and service providers which includes activities such as asset management (Union Investment), insurance (R+V Versicherung), real estate and mortgages (Bausparkasse Schwäbisch Hall, DG HYP) and leasing (VR LEASING).

In 2006, DZ BANK AG's long-term debt ratings were raised by one notch to A+ by Standard & Poor's and in 2007 Moody's raised the long-term rating 2 notches to Aa3. The current ratings are Aa3/P1 by Moody's, A+/A1 by S&P and A+/F1 by Fitch.

DZ BANK Ireland plc

DZ BANK Ireland plc has been in operation in Dublin's International Financial Services Centre (I.F.S.C.) since its incorporation as SGZ (Ireland) plc in November 1994. The Bank received a full banking licence from the Irish Financial Services Regulatory Authority ("IFSRA", previously the Central Bank of Ireland) in April 1995.

DZ BANK Ireland is positioned within the investment bank function of the DZ BANK Group. It is focused on high grade credit products including floating rate notes, asset swaps, syndicated and bilateral loans to a range of parties such as financial institutions, ABS issuers, corporations, sovereign and sub-sovereign entities in Europe and North America. Furthermore it provides medium and long-term fixed rate loans for refinancing purposes to the local cooperative banks in Germany.

DZ BANK AG has issued a "Patronatserklärung" ("strong letter of comfort") in favour of DZ BANK Ireland. In view of its strong financials and the assertion by the parent company, that DZ BANK Ireland will always be in a position to meet its liabilities, the short-term debt ratings from Moody's and S&P are P1/A1 and the long-term senior unsecured debt ratings are A2/A+.

Business Review 2007

2007 was a year of major volatility in the financial markets and the performance of the Bank was significantly influenced by these developments. The favourable conditions in the early months of the year gave way to turmoil driven by the collapse of the US sub-prime market. Investor appetite for new assets deteriorated, bond prices fell and liquidity in the money markets was severely disrupted. In this context, the Bank's business developed satisfactorily with a focus on maintaining excellent asset quality, strong liquidity and sound capital ratios. The balance sheet grew by 13.5% to EUR 7.3 billion and net interest income for the year was EUR 24.3 million. However, the negative mark-to-market valuations on trading book assets resulted in a reported net loss of EUR 24.4 million.

Capitalisation

In 2007, the Bank's total assets increased to EUR 7.3 billion with the most growth taking place in the first half of the year. Risk-weighted assets increased by 16% to EUR 2.5 billion due primarily to an increased volume of 20% risk-weighted assets.

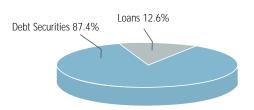

in € million	2007	2006
Total Assets	7,305	6,436
Risk-Weighted Assets	2,519	2,174
Regulatory Capital	241	242
Tier 1 Ratio	7.6%	9.7%
Total Ratio	9.6%	9.7%

Despite the reported loss, the Bank's capitalisation remained well above minimum requirements with a Tier 1 ratio of 7.6% and the total capital ratio, supported by the issuance of EUR 50 million of subordinated debt in 2007, was 9.6%.

Asset Quality

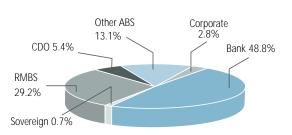

The credit quality, geographic distribution and maturity profile of the balance sheet continue to reflect the conservative nature of the business.

Asset Profile

Approximately 12.6% of the balance sheet consists of loans to banks and corporates, in line with the previous year. Loans to local cooperative banks accounted for 78% of this. The remaining loans exhibit a profile similar to the debt securities outlined below. By the very nature of the cooperative banking model in Germany and its underlying support mechanism the credit worthiness of these banks is considered to be synonymous with DZ BANK Group. Member Banks of the Federal Association of Cooperative Banks ("BVR") participate automatically in a protection system centrally administered and controlled by the BVR and funded by the sector's banks as stipulated in the BVR statutes. These statutes provide extensive opportunities for preventive intervention and rehabilitation of troubled member banks. Consequently, no member bank has failed and no creditor or customer has suffered a loss since the cooperative sector scheme was established in 1932. The majority of the remaining credit exposure in DZ BANK Ireland's balance sheet relates to fixed income debt securities (87.4%).

Analysis of Debt Securities

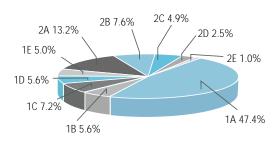

Bonds issued by financial institutions, corporates and sovereigns account for 52% of all debt securities. The remaining fixed income exposure relates primarily to Residential Mortgage Backed Securities as well as to Asset Backed Securities and Collateralised Debt/Loan Obligations. Exposure to the US is limited (see geographical information below) and exposure to sub-prime assets is negligible.

DZ BANK Ireland continued to maintain a cautious investment policy in 2007, reflected by the continued high quality of the Bank's international credit portfolio. The international credit portfolio consists of debt securities and loans, excluding loans to cooperative banks. The entire international credit portfolio is rated the equivalent of investment grade using the Group's internal rating system, with 47% rated 1A the highest possible rating. 50% of the portfolio is rated AAA by the external rating agencies and 98.6% is rated single 'A' or higher. There were no non-performing credits at year-end.

The portfolio is well diversified by borrower and by geography. The ten largest credit exposures at 31 December 2007 accounted for approximately 9.8% of the portfolio.

Ratings Profile of International Credit Portfolio

DZ BANK Ireland's principal geographic focus is on Europe. The Bank monitors the geographical breakdown of its exposures based on the country of domicile of the borrower or guarantor of ultimate risk. 86% of the total international credit portfolio consists of exposures in the wealthy developed economies of Germany, the Netherlands, Italy, the United States, Britain, Spain, Ireland and France.

Geographical Breakdown of International Credit Portfolio

	%	%
	2007	2006
Germany	20.4	12.6
Spain	16.5	19.9
Italy	12.8	15.3
Britain	10.0	10.5
Ireland	8.9	6.5
Netherlands	7.4	9.8
United States	5.3	6.1
France	4.7	3.8
Rest of EU	10.9	12.5
Rest of World	3.1	3.0

Liquidity and Refinancing

Despite the major disruption to financial market liquidity, DZ BANK Ireland successfully managed its liability profile in 2007. The Bank adapted its funding structure to meet the challenges that arose in the latter part of the year. Consequently interbank money market outstandings and French CD issuance totalled EUR 1.6 billion and EUR 634 million respectively. The Bank managed its asset portfolio more actively and significantly increased its repo activity to EUR 3.5 billion at year-end. These repurchase transactions were conducted with the European Central Bank and a number of bilateral and triparty repurchase counterparties. The decline in the general ABCP market benefited the Bank's multi-currency Euro Commercial Paper (ECP) programme, as investors sought out traditional bank paper. Year-end outstandings totalled EUR 1.3 billion. Significantly, the Bank managed its liabilities without increasing its cost of funding and, in a large proportion of cases, took advantage of market uncertainty by reducing the Bank's overall funding costs.

DZ BANK Ireland continues to have a well diversified funding base and enjoys access to various wholesale funding sources from a wide range of counterparties and markets supported by the "Patronatserklärung" ("strong letter of comfort") from DZ BANK AG.

Repo - ECB 16.9%

Long-term funding is obtained through bilateral "Schuldschein" instruments which totalled EUR 53 million and the aforementioned EUR 50 million subordinated debt issue.

Profitability

Repo -Bilateral 29.5%

Although net interest income of EUR 24.3 million was essentially flat year-on-year, the Bank reported a pre-tax loss of EUR 27.8 million due primarily to the mark-to-market effect in the Trading Book.

Net other operating income, which includes realised and unrealised gains and losses on the investment and trading portfolios, net fee/commission income and changes in the value of the macro and other hedging activities, was dominated by the unrealised losses in the trading book. Realised losses were negligible. Fees, which include income generated from the provision of ABS-related services to Group entities, were lower due to reduced activity in the CORAL conduit programme for which the Bank provided Securities Investment Management services.

Total administrative expenses were EUR 4.6 million, an increase of 8.8% year-on-year due to higher staff costs and costs associated with the roll-out of Group-wide IT-related projects. The average number of employees in 2007 was 30 (27 in 2006). The net loss for 2007 after adjusting for tax amounted to EUR 24.4 million.

Net Profit Analysis

€′000	2007	2006

Risk Management

Please refer to the Financial Statements of DZ BANK Ireland as of 31 December 2007 for full disclosure with respect to Risk Management.

Independent Auditors' Statement to the Members of DZ BANK Ireland plc

Independent Auditors' Statement to the Members of DZ BANK Ireland plc

We have examined the summary financial statements for the year ended 31 December 2007, which comprise the Income Statement and Balance Sheet. We have agreed to report to you our opinion on the consistency of the summary financial statements with the statutory financial statements and directors' report, on which we reported on 8th April 2008. This report is made solely to the company's members, as a body.

The Directors are responsible for the preparation of the summary financial statements for the purposes of compliance with Section 20 of the Central Bank Act, 1971.

To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our work, for this report, or for the opinions we have formed. We have carried out the procedures we consider necessary to ensure that the summary financial statements have been properly complied based on the statutory financial statements which set out the financial position of the company. We also read the other information contained in the directors' report and consider the implications for our report if we become aware of any apparent misstatements within it.

In our opinion the summary financial statements are consistent with the full statutory accounts and directors' report for the year ended 31 December 2007.

On behalf of AIB International Financial Services Ltd (Company Secretary)

Notes to the Summary Financial Statements

for the Year Ended 31 December 2007

Summary Financial Statements

The Summary Financial Statements are not the financial statements which are required to be filed with the annual returns to the Companies Registration Office. However, copies of the financial statements will be filed with the 2007 Annual Return.

The auditors have made a report under Section 163 of the Companies Act, 1963, in respect of the financial statements of the company which relate to the year ended 31 December 2007 and with which the Summary Financial Statements purport to deal. The auditors' report was unqualified.

Availability of Financial Statements

Copies of the full financial statements are available from:
